Programme & Project Management • Programme Evaluation • Community Engagement • Monitoring & Evaluation • Impact & Outcome Monitoring • Needs Assessment • Safeguarding • Case Management • Stakeholder Partnerships • Grant/Funding Review • Proposal & Report Writing • Community-Based Service Delivery

Government & Public Administration

Government Administration • Public Policy Implementation • Public Programme Delivery • Policy & Operational Research • Evidence Analysis • Risk Assessment • Information Verification • Multi-Agency Collaboration • Government–Nonprofit Partnerships • Regulatory Compliance • Public-Service Reporting

PROFESSIONAL EXPERIENCE

Orizon Design — Senior UX/UI Product Designer

Product design agency • Part-time • Remote | Jun 2023–Present

- Design and evaluate user-centred digital products and interfaces, translating business requirements and user needs into clear product experiences.
- Conduct UX and user research and analyse qualitative and quantitative data to identify behaviours, pain points and opportunities that inform design decisions.
- Develop user journeys, wireframes, prototypes and interface concepts; iterate designs using usability findings and stakeholder feedback.
- Apply accessibility, information hierarchy, consistency and visual communication principles to improve usability and design quality.
- Collaborate with stakeholders and multidisciplinary teams, communicating design rationale and translating requirements into practical product improvements.

Migrant Help — Client Adviser, Modern Slavery Victim Care Service

Nonprofit organisation • Home Office Modern Slavery Victim Care Contract | Mar 2023–Present

- Deliver a UK Government-commissioned public service programme within the nonprofit sector, supporting survivors of modern slavery and other vulnerable individuals.
- Implement programme requirements and government guidance through needs and risk assessments, individual support planning, safeguarding and ongoing case management.

- Coordinate community-based support across healthcare, housing, welfare, counselling, legal and integration services, monitoring needs, interventions and outcomes.
- Prepare programme reports, assessments, funding requests and case documentation while maintaining regulatory, confidentiality and data-protection standards.
- Collaborate with the Home Office, local authorities, NHS services, legal professionals, charities and community organisations to deliver coordinated support.

National Agency for the Prohibition of Trafficking in Persons (NAPTIP)

Federal Government agency • Civil service

Intelligence Officer / Acting Squad Head — Civil Service | Jun 2019–Jul 2024

Full-time duties: Jun 2019–Mar 2023 • Study leave: Apr 2023–Jul 2024

- Conducted investigations, intelligence gathering, policy research, OSINT and digital evidence analysis relating to trafficking, exploitation and victim protection.
- Evaluated multi-source evidence and digital information to identify patterns, assess risk and support operational and public-policy decision-making.
- Analysed multi-source qualitative and quantitative information and produced intelligence briefings, analytical reports, risk assessments, policy inputs and strategic recommendations.
- Designed and contributed to the development of organisational, operational and public-facing products, applying user needs, accessibility, usability and visual communication principles.
- Implemented government policies and public programmes relating to trafficking prevention, victim protection, rehabilitation and community awareness.
- Worked with nonprofit organisations, NGOs and community stakeholders and supported the assessment, funding, coordination, monitoring and evaluation of community-based programmes.
- Led multi-agency operations and maintained evidence integrity, confidentiality and secure information-handling standards.

Union Bank PLC — UI/UX Product Designer

Retail and commercial banking | Dec 2016–Jun 2019

- Engaged retail and commercial banking customers and internal stakeholders to identify user needs, pain points and service expectations, translating customer insight into product and UX improvements.
- Contributed to UI/UX and product-design initiatives, using customer feedback, user requirements and service data to improve banking products and customer-facing experiences.
- Conducted customer research and analysed user needs, behaviours and pain points to support user journey and service improvements.
- Used customer feedback, service data and performance information to support evidence-based product and service improvements within regulatory and compliance requirements.

Amazon UK — Junior Product Designer

Aug 2015–Nov 2016

- Supported user-centred product-design activities within a fast-paced technology and e-commerce environment.
- Contributed to product research, usability analysis and iterative improvement of digital and product experiences.
- Translated user and operational requirements into practical design solutions while working within structured quality and delivery processes.

Merit Empowerment Initiative — Project Manager / Coordinator

Nonprofit & community programmes | Sep 2012–Aug 2015

- Managed community-development, youth-empowerment and capacity-building programmes from planning through implementation, monitoring and evaluation.
- Conducted community needs assessments and coordinated community engagement, stakeholder partnerships and programme delivery.
- Developed project proposals, programme reports, monitoring frameworks and funding-related documentation.
- Collaborated with government agencies, NGOs, community leaders and development partners to deliver community-focused initiatives.

SELECTED AI & EXPERT ENGAGEMENTS

Project Aether — Outlier | AI Evaluation / Generalist Contributor

May 2026–Present

- Contribute to structured AI evaluation work, applying detailed guidelines, analytical judgement, response review and quality-focused feedback.

Project Thor — Writer, Mercor

Contract offer: 8 Aug 2026

- Selected for professional writing work requiring clear, accurate, instruction-aligned content and editorial judgement for AI training workflows.

Generalist Expert — Mercor

Contract offer: 10 Jul 2026

- Selected for broad-domain expert work involving structured reasoning, evaluation and high-quality human feedback for AI systems.
